

# SWEET PERIL

SUGAR IS THE NEW TOBACCO

NBC-405

Who has the sweetest tooth? <sup>[1]</sup>

Sugar Consumption Per Capita, 2009

Source: HelgiLibrary  
<http://www.helgilibrary.com/indicators/index/sugar-consumption-per-capita>

According to the FAO, about 24 kilograms of sugar, equivalent to 260 food calories per day, was, on average, consumed per person of all ages in the world in 1999. In 2008, total per capita consumption of sugar and sweeteners, including natural and artificial sweeteners, equalled 61.9 kilograms per year.

5.5%

Alcohol

3.1%

Physical inactivity

PROPORTION OF DISEASES CAUSED GLOBALLY <sup>[1]</sup>

Tobacco

## EFFECTS OF SUGAR

- Caries
- Fatty Liver Disease
- Type II Diabetes
- Obesity

<sup>[3]</sup>

## DATA <sup>[4]</sup>

Sweeteners common in the Indian demographic and their sugar content:

Honey: Fructose 38.2%, Glucose 31.3% and maltose 7.1%.

Brown sugar: Calcium, Potassium, iron and magnesium.

Khandasari: 94-98% sucrose, less refined than sugar contains some calcium.

Palm Sugar: 70-79% sucrose, glucose and fructose 3-9%

High fructose corn syrup contains 55% fructose and 45% glucose while sucrose or table sugar consists of 50% fructose and 50% glucose.

## ADDICTION

Compulsive need for and use of a habit-forming substance (such as heroin, nicotine, or alcohol) characterized by tolerance and by well-defined physiological symptoms upon withdrawal. <sup>[7]</sup>

Experts debate whether addiction is a "disease" or a true mental illness. <sup>[8]</sup>

**TOBACCO (NICOTINE) HAS BEEN IDENTIFIED TO BE ONE OF THE 5 MOST ADDICTIVE SUBSTANCES IN THE WORLD CLOSELY FOLLOWED BY SUGAR.** <sup>[9]</sup>

There is a dose-dependent relation between periodontitis and exposure

## DATA <sup>[5]</sup>

- Oral cancer.
- Asthma
- Emphysema
- COPD
- Periodontal destruction, potentially malignant lesions like leukoplakia, tobacco pouch keratosis, stomatitis nicotina.
